SUMMARY

Computer Science Engineering student (2023–2027) specializing in Java Full Stack development, with two deployed web applications delivering 30–40% measurable performance improvements. Completed a 10-week Agile industry internship building and shipping a Java-based caching system, leading code reviews and coordinating cross-functional delivery. Salesforce Certified Agentforce Specialist seeking an entry-level Java Developer or Full Stack role to contribute technical skills to a collaborative engineering team.

SKILLS

Programming Languages: Core Java (Spring Boot)

Web Technologies: Angular, JavaScript, HTML5, CSS3, TypeScript, Responsive Design, Bootstrap

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, VS Code, Eclipse

Concepts: Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC)

EXPERIENCE

Java Full Stack Developer Intern

January – March 2026

EduSkills Academy, AICTE

Certificate ID: 2026-4383590707

- Collaborated with a team of interns across a 10-week Agile sprint cycle, completing Java Full Stack training in Core Java, Spring Boot, Hibernate ORM, and MySQL; delivered all milestones on schedule.
- Led the design and delivery of **In-Memory Cache with TTL Lite** – a backend caching module with TTL expiration and thread-safe concurrent data access; reduced API response times by 25%.
- Developed, tested, and documented RESTful APIs using Spring Boot and Hibernate ORM, applying MVC and OOP principles; presented API design decisions during stand-ups and sprint reviews.
- Conducted structured pull request reviews for teammates, maintained unified Git workflows, and reported module findings to the group, directly raising code quality across all sprint deliverables.

PROJECTS

Ekart E-Commerce Website | Angular, TypeScript, Spring Boot, HTML5, CSS3

[Live Demo](#)

[GitHub](#)

- Engineered a fully responsive e-commerce application using Angular and TypeScript; ensured cross-browser compatibility across Chrome, Firefox, and Edge on 5 or more device types.
- Owned product listing and filtering architecture with Angular and REST API integration, cutting search-to-result time by 40% through optimized data binding and state management.
- Built reusable Angular dashboard components for data visualization, reducing codebase duplication by 25% and capturing design decisions through inline code comments.
- Profiled application performance via Lighthouse, achieving a 30% improvement in page load speed and reported findings as measurable benchmarks.

Expense Tracker | HTML5, CSS3, JavaScript

[Live Demo](#)

[GitHub Repo](#)

- Constructed a fully accessible expense tracking interface following WCAG 2.1 guidelines, improving usability for users relying on assistive technologies.
- Designed a mobile-first layout using CSS3 Flexbox and media queries, ensuring consistent rendering from 320px to 1440px screen widths across all major browsers.
- Refactored and modularized the CSS architecture, reducing stylesheet size by 20% and structuring the codebase for long-term extension.
- Executed cross-browser testing across Chrome, Firefox, and Edge; identified and resolved all critical rendering issues with zero layout-breaking bugs at release.

EDUCATION

Swarandhra College of Engineering and Technology, Seetharamapuram

2023 – 2027

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.0 / 10.0

Sri Chaitanya Junior College

2021 – 2023

Board of Intermediate Education, Andhra Pradesh

CGPA: 8.36 / 10.0

CODING PROFILES

[LeetCode](#)

[CodeChef](#)

CERTIFICATIONS

- Java Fundamentals** – Infosys Springboard — Core Java, OOP, Exception Handling, Collections
- SQL (Basic/Intermediate)** – HackerRank — SQL Queries, Joins, Aggregations, Database Concepts
- Angular** – Infosys Springboard — Angular, TypeScript, Components, Routing
